

CO1-AT2

NAME: JANGA RAMESH

REGISTER NUMBER: 192311230

COURSE: DWDM COURSE

CODE: CSA1613

System Architecture & Workflow

- ADC: Converts continuous analog signals into discrete digital samples.
- Processor: Performs mathematical operations based on filter coefficients.
- DAC: Reconstructs the processed digital sequence into an analog output.
- Memory: Stores coefficients and previous samples for recursive processing.
